Listed Building refit at Bradley Hall

Oakfield Displays have carried out their second refit to a Grade 2 listed building near Ashbourne, Derby. The 6 week contract involved a complete wall, floors and ceilings "fit out" to form new offices within the historic building which was once owned by Hugo Meynell.

The project required suspended ceilings, solid timber floors, bespoke office storage units, reception desks, doors and new wooden sash windows. Oakfield also managed all the electrical and mechanical aspects associated with the project.

The current owners who are members of The Listed Property Owners Club have recommended Oakfield as a preferred supplier. Oakfield undertake bespoke joinery including windows, doors and wood panelling. They were pleased to tackle this tricky project having to carry out work in a sensitive environment.
