Eddeco offices fit out completes ahead of programme

Heanor based Oakfield Displays have completed their latest office fit out for Eddeco Petroleum Services in Castle Donington ahead of programme.

The 9 week contract included the creation of a new mezzanine floor within the factory, new stairway and ground floor reception area.

Oakfield had to carefully plan the installation and fit out works with the client to ensure that factory operations were not impeded.

The finished offices were completed on time and to budget and included suspended ceilings, computer floors, a range of bespoke office storage units, reception desks, doors, and floor finishes. Oakfield also managed all the M&E associated with the project.

Commenting upon the project Mike Wrigley (Landlord) said " I was concerned that the tight programme and restricted working hours due to factory operations would prove too demanding but Oakfield were confident from the start and did a fantastic job. I will certainly use them again."
